

CUSTOM HOME MAILBOX SPECIFICATIONS

To reflect the current United States Postal Service (USPS) specification for the Custom Mailboxes at Shady Canyon, the Design Guidelines section on Mailboxes, page 86, is being revised to the following:

1. The face of the mailbox shall be located so it is right against the curb.
2. The height from the bottom of the curb to the bottom of the receptacle shall be 42". The maximum is 48".
3. Mailboxes shall be 24" to 30" wide by a maximum of 60" high.
4. Mailboxes shall match the architectural style of the house.
5. If a lock is used on a mail receptacle, the receptacle must have a slot large enough to accommodate the normal daily mail volume.

Please note that it is the Lot Owners' responsibility to confirm with the USPS that their mailbox meets current specifications. If you have any questions, please contact Julie Huster at (949) 453-4928. Thank you!
